Online Registration

TEE College

This document explains what to expect when using the online interactive registration application process:

Step 1: First you need to have a student number and a valid email address – which the College has on your student record AND Second your student account needs to be enabled for online access. When a student account is enabled for online access an email explaining this is automatically sent to the email address that is linked to that student account. You need to have received that email before this process will work for you.

*If Step 1 hasn’t happened then nothing described below will work for you.*

Step 2: From the College website – www.tee.co.za – go to the Register page using the top menu link.

Step 3: Click on the Online Access link. You will be directed to the login server hosted by ViaData. (*Your browser might look different from what is illustrated here, but the essential aspects remain the same*).

This is a secure connection using a signed server certificate. The web address and College branding will remain the same in the browser window through the entire process.

Step 4: You will be prompted for a login.

The email you received when your student account was enabled for online access will give your username and password.

Your username is your email address, so type your email address in the Username field.

Enter the password as given in the email sent to you and click on the “Login” button.

Step 5: Once logged in you will see a side menu with two links – “My Details”, “My Applications”, My Courses, etc.

Select “My Applications” to start an online application. Each programme is shown as a row of information – which may extend past the right margin of your browser window!
The **My Applications** View:

This is an illustration of a student who is currently registered for four courses on the Diploma in Theology & Ministry. Completed courses and the credits achieved are shown. Credits still required to complete the programme. Previous registration applications are listed. Clicking on the Apply button starts a new registration application.

The **My Details** View:

Clicking on the My Details link in the left-hand menu does two things:

- Removes the left-hand menu to give you more space in the browser window ... clicking on the left-pointing arrow next to your name will restore it.
- Displays a series of tabs allowing you to access different aspects of your personal details as currently held by the College.

It is possible to add new or missing information, correct existing information, delete old information, and change your login password. **If you change your password and forget it then College staff are not able to give it to you – all they can do is reset your online access which will send you a new email with your login details.**

Click on the tab to show its fields. If necessary, make changes.

Click “Save”.

*Changed fields are indicated by a change of colour. Please note this does not change your details in the student database!* This is a partial copy of Student data, and a College staff person will check the changes made and if appropriate add them into the Student database – only password changes take effect immediately.

**Notes:**

Some changes require you to provide supporting documentation – changes to your name, your ID or your date of birth – before the College will accept the change.

Under “Address Details” your usual correspondence / contact address is your Postal Address – we use Physical Address when a Courier is making a delivery to you.

Under “Other Details” students on accredited programmes will find their NLRD statistical data which is reported (by law) to the HEQCIS – we do not require documentation for these changes.

**Please only make necessary changes. Giving us a valid email address and cell phone number is a big help in communicating urgently with students.**

Use the Back Arrow to return to the Program View – and click on the **Apply** button to start a registration application.
Available courses: This screen lists all available courses. You still need to select courses in line with the programmes rules. If you make impractical or inappropriate selections then College staff will rectify that before processing your registration application.

Previous attempts at Courses: If you had previously registered for particular courses, and have not yet passed them, then that information will be displayed. In the illustration below the student failed assignment 1 on two courses, but passed assignment 2 – so can register for the Assignment 1 Component.

Course registrations:

A first attempt at a course is always a “Full” registration – and all material is issued.

A student who has passed at least half the assessments on a course can register for the remaining assessments as “Component” registrations. Shown as “Apply Comp”.

A student who has attempted a course, but cannot register only for Components, can then “Repeat” the course. This is at a lesser fee, and workbooks are not re-issued – although the assignments are those of the new academic year (and not the old assignments).

Click on the appropriate button on the course row to select the type of course registration.

The Rules, Regulations & Policies booklet, as well as the Year Books, explain how these registration options work.

Changing a course registration:

Once you have selected a course you also have the option to remove that course selection.

Click on the Remove button.

You can also remove and reselect a course to change its payment option or its registration type.
Course options:

Once you have selected a course you are then prompted for any particular options that apply to that course.

For courses offered in multiple languages this is where the language selection is made.

The payment option is made using the radio buttons at the bottom of the window to select your preferred payment option. You can use different options for different courses – but only a maximum of three Option C selections for courses. *(Option C is not available to students who did not honour previous instalment arrangements – only Option A is then available).*

If you click OK but then decide that you need to change your payment option (or the registration type) then first “Remove” the course selection (as explained above) and then reselect the course choosing your desired option.

Keeping track of the Registration application cost:

The panel above the list of available courses shows the costs associated with the selected courses (taking into account their registration type – Full, Repeat or Component) as well as their payment option (A – discounted, or C – in instalments). As you add, remove, or change courses and their options these values will be updated.

Clicking on the Printer icon will produce a Pro-Forma Invoice for your current selection.

**Option A:** The “Due at Registration” will include the full cost of selected courses and components, any applicable exam fees, and the registration application fee if applicable. That figure is the total amount to cover the cost of registering the selected courses.

**Option C:** The “Due at Registration” includes the deposits for all selected courses and cost of components, any applicable exam fees, and the registration application fee if applicable. This is the minimum payment for registering the selected courses. The Total Instalments shows how much more will need to be paid to cover the total cost of the registration – this is usually settled in four monthly payments and that monthly figure is shown as the Instalment/Month.

**Final Step:** Once you are happy with your course selection, print a Pro-Forma Invoice – which includes information for making payment for this registration application.

You can also use the Pro-Forma invoice as a Quotation for the purposes of applying for a loan with Edu-Loan/Fundi.
Should you leave the browser session before clicking the “Submit” button then you are able to access application by clicking on the “Edit” button once you log back in.

Once you are happy with your registration application then click the “Submit” button.

**Delivery methods:**

Once you click the “Submit” button you will be prompted for a delivery method. You can either arrange for your study materials to be collected from the College, or they will be sent by Courier service.

Please see the “How to Register” booklet (posted to all current students and available on the College website) for the financial implications of the delivery services. Please be aware that we will bill the ACTUAL postage cost to your student account.

**Completing your application:**

Once you have submitted your online application then make a payment to cover the cost of the registration application (as is reflected on the Pro-Forma invoice).

Please ensure that you have entered the “beneficiary reference” correctly when making the payment, using your student number, surname and initials – this enables us to link the payment to your registration application.

Once payment is made please send a copy of the proof of payment to the College: email to payments@teec.co.za or fax to 086 574 9998.

The College registration process will automatically send email / SMS alerts with regard to collections from the College and Courier delivery tracking numbers.
